The towns of Balranald and Maude were partly demolished by a severe storm and two lives were lost. Torrential rains caused floods in some southern districts and loss was sustained where harvesting had not been completed. At the end of January, torrential downpours were experienced also on the extreme north coast. During February, the total rain was above normal over a large part of the western division, most of the central and south-western slopes and eastern Riverina, and in smaller and isolated localities elsewhere. Some severe storms were experienced in various parts early in the month and very heavy downpours caused floods, one being at Parkes. Later in the month severe storms were again experienced and considerable damage was done to buildings chiefly in the central and north-eastern districts. There were very heavy downpours of rain and floods in the Richmond and Tweed rivers districts between the 5th and 12th March, the remainder of the State received fair to good but less than normal rains. Frosts were experienced on parts of the highlands after 22nd of March, and snow fell on the extreme southern tablelands. Southerly gales with rough weather occurred on the 3rd and 4th, and during the last week of March a heavy south-east swell set in along the coast and hampered shipping.

NOTE.—The great majority of females engaged in rural occupations are employed in conjunction with domestic duties, very few being returned as working for wages. Since 1919 a more careful collection has been made of the number of females engaged in rural pursuits, and it would appear that previously about 12,000 females were included each year (e.g., wives of the proprietors) who were engaged wholly in domestic duties. The number of females quoted in the above table for years prior to 1920 represents, therefore, the number as returned, less 12,000.

## No. 49.—New South Wales Wheat Harvest, 1924-25.

The results were compiled from returns which were made after the crops had been harvested, and depend upon statements furnished by each of 17,624 wheat-growers in the State.

The area sown for grain was 3,543,860 acres, including 30,850 acres which failed entirely.

The area sown for hay was 386,800 acres, including 3,834 acres which failed. The fed-off area was 18,024 acres, making a total of 3,948,680 acres sown with wheat.

The grain harvested amounted to 18,928,437 bags, equivalent to 59,785,000 bushels, or 16·9 bushels per acre.

The production of hay was 532,030 tons, or 1·38 tons per acre.

In January, from an estimate based on returns supplied by the individual growers, it was anticipated that the yield of grain would be 20,277,385 bags, equivalent to 60,832,000 bushels, or 17·4 bushels per acre. This yield was not realised, as the actual returns fell short of the estimate by 1,047,000 bushels, or 1·7 per cent.

The decrease in the actual yield, compared with the estimate of four months ago, has been due almost entirely to the heavy winds, rains and hail experienced during the harvesting operations in the North and Central Western Slopes and in the Central Plains divisions.

In many instances matured crops were knocked down, with consequent shedding of grain, whilst in others rust and bleaching were in evidence.

Of the total area harvested for grain, 149,894 acres were sown on new land, 1,583,047 acres on fallowed land, and the balance, 1,780,069 acres, on stubble, the respective productions of grain per acre being 14·8 bushels; 19·7 bushels; and 14·8 bushels.

The following table shows the actual results of the wheat harvest in the principal divisions of New South Wales:—

† Includes Ship Stores exported overseas.

Note—The exports in 1921 and 1924 include articles produced in other States of Australia. Since 1st January, 9 the Federal Customs Department has classified all goods produced in the Commonwealth simply "Australian," without distinguishing, as formerly, the particular State where they were produced.
